Richard:

I was asked by our attorney last week to request the 90 day period for an objection (for Osh Kosh) based on the blending provisions included in the permit.

There will be some other comments which also surfaced including the PMP Mercury provisions and some special conditions, and possibly some further reference to the P limit determination.

I have been on annual leave this week , but plan to come in the office tomorrow and will call you. Will you be in tomorrow?

Thanks and regards,

John Wiemhoff

Subject: Comments on Proposed Oshkosh WWTF Permit

John,

When we last spoke nearly two weeks ago you stated that it appeared the only issue that EPA may object to in the proposed Oshkosh WWTF Permit was the language authorizing blending – though you were expecting final word from your legal staff on that matter. It sounded like you expected that within a matter of a day or so, and then planned to send us a response. However, I've not yet received that response. Since then I have received EPA's preliminary comments on the proposed Fond du Lac WWTF permit (which is also under review by EPA). So I'd just like to clarify whether you plan to likewise send us your preliminary comments on the Oshkosh permit, or whether we should expect to receive only the final version of those comments.

Sincerely,

Wastewater Specialist
